Professional Experience

2018–Current Full Stack Developer | Tata Consultancy Services, Pune, Maharashtra

- Developed user interface components and implemented them following well-known React.js workflows (such as Flux or Redux).
- Ensured that components and the overall application are robust, responsive, and easy to maintain.
- Knowledgeable of frontend and backend requirements.
- Familiar with RESTful APIs.
- Designed and developed efficient and maintainable software according to business objectives and needs of various clients.
- Maintained complex technology architecture and collaborated with product team to implement new features and strategically plan for future projects.

Technical Projects

Blog Publishing App <https://github.com/AkshaySRaiguru/react-redux-blog>

A full stack web application that allows multi-user blogs with time-stamped entries. It uses React for the frontend and Node.js and MongoDB for backend. Some features include registering user accounts, sign-in/sign-out and upvoting the blog.

Education

2014–2018 Bachelor of Engineering | Electronics & Telecommunications Engineering Savitribai Phule Pune University | First Class with Distinction
